DETAILED ACTION

Current Status

1. Claims 9-28 are pending in the application.

Priority

Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d).

Allowed Claims

Claims 9-28 are allowable over the prior art of record.

Reason For Allowance

The following is an examiner's statement of reasons for allowance: Applicants claim a process for obtaining a purified gas by removing polysulfanes from crude gas formed during the production of hydrogen sulfide, comprising: (a) passing said crude gas through a wash system where said crude gas is brought into contact with a wash solution comprising water or methanol; and (b) collecting said purified gas from the wash solution of step (a), wherein all the variables are as defined in the claims. The process was neither found to be obvious nor anticipated by the prior art of record.

The closest prior arts are Bec et al., {FR 2844208}. Bec et al. teach a process for the purification of a gas comprising mainly hydrogen sulfide obtained by reaction of hydrogen with liquid sulfur in an industrial unit, by passing the gas through a filter containing porous particles of active carbon, alumina or silica. The process of the invention resolves the problem of formation and decomposition of sulfanes, H_2S_x , where x is 2 or more. See abstract.

Applicants process for obtaining a purified gas differ from Bec et al. process in that applicants claim a process that employs water, methanol, aqueous solution or methanolic solution while Bec et al. teach a process for the purification of a gas by passing the gas through a filter containing porous particles of active carbon, alumina or silica. The difference is clear because applicants' process that is conducted in liquid state while Bec et al. teach a process that is conducted in solid state. This difference is not readily apparent and would not have been suggested to one of ordinary skill.

All claims (9-28) are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
